## Wednesday, March 19<sup>th</sup>

## High Performance Office/Classroom Lighting

### Speaker:

**Mr. David Brown of Finelite, Inc.** where he is Area Vice President, Central Region of North America, is presenting this IESNA Event. Mr. Brown is a Graduate of Purdue University with Graduate Studies in Architectural Engineering at Penn State. [Being in Buckeye Territory we will not hold that against him] David started his career as a Lighting Design Consultant with The Lighting Practice out of Philadelphia, Pennsylvania, then becoming a Sales Representative for 5 years with a local lighting agency in the Philly area, before taking his current position with Finelite, Inc in 2000.

## FINELITE

### LIGHTING CONCEPTS ONE

This presentation is an accredited AIA Topic on High Performance Classroom Lighting. [Information can also be applied to Commercial Office space and Training Centers.] This presentation examines and resolves the challenges of lighting and lighting controls of today's High-Tech classrooms.

Finelite is dedicated to lowering lighting energy consumption can be seen in our innovative approach to system-based lighting design.

**WHERE:** Holiday Inn Rockside  
Independence, Ohio

**WHEN:** Wednesday, March 19<sup>th</sup>  
5:30 Social  
6:00 Dinner  
7:00 Program

**COST:** \$25

# THIS MONTH'S PROGRAM BROUGHT TO YOU BY:

**FINELITE**

Today, Finelite focuses its resources on the design and manufacture of high performance, environmentally sustainable lighting systems for offices and educational facilities. A leader in manufacturing processes and technologies, Finelite utilizes a systematic and lean component inventory approach that allows continuous product improvement while simultaneously eliminating waste.

It is our belief that to achieve distinction in today's competitive marketplace, every individual must concentrate on the important issues with as much focus and intensity as possible.

## **Sustainability, LEED and Green Products**

Because we're committed to the green spirit of lighting, our fixtures are engineered with the most efficient combinations of ballasts, lamps and optics available to produce the most light from the least amount of energy. But at Finelite, product sustainability

doesn't end with energy savings. Many of our main fixture components contain high percentages of recycled materials, and every Finelite fixture goes through an environmentally friendly powder coat paint process. Even our packing and shipping methods are sustainability-driven: special palletized packing allows us to eliminate the need for boxes that would otherwise be discarded soon after arrival at the jobsite.

## **ICLS — Solutions for Today's Classroom**

The Integrated Classroom Lighting System (ICLS) meets LEED & CHPS for Schools, accommodates today's teaching technology and drastically reduces monthly utility expenses. Patent Number 7,215,088.

**LIGHTING CONCEPTS ONE**

# SECTION NEWS

## Educational Opportunities

The Lighting Education Institute is pleased to announce two online lighting classes to start off the new year:

**Lighting Calculations – Online**  
**March 24 – April 28, 2008**  
**Mondays, 11:30 am - 1:00 PM EST**

Join Craig A. Bernecker, Founder and Director of The Lighting Education Institute, in six 90 minute web seminars covering these topics beginning on March 24 and ending April 28. The weekly web seminars will be supplemented by a dedicated course management website which includes weekly lessons, resources and “assignments,” interactive forums and chat sessions, and archiving of the web seminars for review or if you miss the live seminar.

All you need is a computer and telephone to participate. Courses are designed to be taken individually or sequentially as a part of a broader lighting education program.

Space is limited to 15 enrollees for each course.

For further information visit The Lighting Education Institute website, [lightingeducation.com](http://lightingeducation.com), or call 610-524-7969, or email [lei@lightingeducation.com](mailto:lei@lightingeducation.com).
