WHAT IS THE BEST WAY TO MEET THE CODES WITHOUT TURNING OFF THE OWNER

With all the codes and requirements for lighting controls, as well as all the different methods for the control of lighting, what is the best method based on the application and budget?

We have a great opportunity to see a presentation by John McBride of Watt Stopper that will address some of these issues. In this program, the different lighting control methods available will be discussed that will meet the current codes. Then, which lighting control method makes the most sense, economically and application wise to the owner. Please contact Wendy by Monday, May 18th if you wish to attend.

This program is worth 1 PDH credit. The Seminar is on May 20, 2009 at the Holiday-Inn Independence. Dinner is at 6:00 p.m. with the program from 6:45 p.m.–7:45 p.m. We hope you will all be able to attend this educational opportunity.
