New IES Outdoor Luminaire Classification System and the Model Lighting Ordinance

Difference of light pollution

As we continue to invent new ways to light our environment at night, we also need to be aware of what it is doing to our environment around us.

IES and the International Dark Sky Association are currently looking at recommendations to help lighting designers and manufacturers select and create Luminaires that will help reduce light pollution in our environment. Each city and municipality can create their own light pollution ordinances without any guidelines or input from lighting professionals. The Model Lighting Ordinance (MLO) is a guide to what cities should use and what lighting designers should consider when doing an outdoor lighting design.

We are very fortunate to have John Selander, the current IES Illuminating Engineering Society President and Director of Specification Sales, North America for Acuity Brands Lighting, present this very important program. We not only get to meet your new Society President, but also have a presentation on a topic that is very timely and gives us the opportunity to see what we are missing . . . the sky.

Tuesday, Nov. 16, 2010
Social: 5:30 p.m.
Dinner: 6:00 p.m.
Program: 7:00 p.m.
1 PDH

Holiday Inn, Rockside Road
Independence, OH

Sponsor: Jack Duffy & Associates

Cost: \$25

Please pay by check or cash at the event or [use our convenient PayPal Link on our website](#). Note: If you pay by Credit Card, you don't need to RSVP Wendy unless you don't receive an acknowledgement by e-mail or sign up two days prior to the event.

The Best LED Lighting

Illuminates & Enlightens

Indoor | Ambient | Intelligent

Lithonia Lighting is pioneering intelligent, controllable, adaptable LED lighting solutions.

"We were immediately pleased with the color temperature and controllability of RTLED."

- Associate Vice President Shelley Kaplan, Babson College

"RTLED delivered as promised and Lithonia Lighting confidently supported the product."

- Architect Jeffery Herr, San Diego State University

- High quality volumetric lighting
- Embedded controls reduce overlighting
- Plug-and-play connectivity with Cat5 cable
- 50,000-hour system life at L80 depreciation

Beyond cost and sustainability benefits, better lighting can improve emotional well-being and productivity. Our exclusive RTLED lighting systems recognize all these opportunities. They are designed to meet your current and future needs. They consider the big picture and help you see it more clearly. They produce more light, save more energy and solve more problems. So when tomorrow's changes become your new challenges you can rest assured Lithonia Lighting has already addressed and overcome them.

Visit www.lithonia.com/RTLED/LDA for free white papers, case studies and product spec sheets.

THE 2010 IES LIGHT WALK

Lumen Press Newsletter

President's Report

In the next two months we have two exciting programs planned for the Cleveland Section of IES. I hope you will have the opportunity to attend.

The November Program is the Model Lighting Ordinance which is sponsored by Jack Duffy & Associates. Thanks to Jim Parsons, we not only have a speaker, but we have the President of the Illuminating Engineering Society and Director of Specification Sales of North America for Acuity Brands Lighting, John Selander. John's topic for the presentation will be *New IES Outdoor Luminaire Classification System and the Model Lighting Ordinance*.

John has been active with the IES for many years. As a member of five sections, John has been the President of the Western Michigan Section and Chair of the Lighting Economic Committee. This committee is responsible for RP-31, Recommended Practice for the Economic Analysis of Lighting. John is also the author of the newly published IES Seminar for Lighting Economics. Other positions that John has held include: IESNA Director, Vice President of Design and Application and a member of the Technical Review Council of the IES. John is also currently a member of the Merchandise Lighting Committee.

John's credentials include: BS Degree from Michigan State University, MBA Babson College, Lighting Certified from NCLQP and LEED Accredited Professional from the US Green Building Council.

We hope you will be able to attend this important program and welcome our New IES President to Cleveland.

In December, we thought of trying something a little different. At our planning meeting in July, we had some input from Venture Lighting about a Light Walk of the City. As ideas were tossed back and forth, we came up with a December IES Light Walk. The walk would be a tour of various downtown Cleveland landmarks and buildings which have been recently renovated. At each stop mentioned in the walk, we will have an IES representative or guest speaker tell us not just about the lighting, but a little about the history of the building and of Cleveland.

I hope you will be able to join members of the IES Cleveland Section for a guided tour through Cleveland Public Square to see and hear about the notable lighting projects in our own back yard and see the Lighting in Cleveland in a different light.

Richard Rutledge

IES Cleveland Section President
